

We're your
key to risk-free
openings, rollouts
and renewals.

logistics, consolidation, and distribution

RPM takes care of all of the logistics associated with your project. This includes, but is not limited to: planning, working with vendors on packaging and pallet configurations, consolidations, reverse consolidations, warehousing, inventory management, fulfillment, transportation, and distribution. You just tell us what you need, where you need it and when it needs to be there... and then sit back.

RPM-Express, our distribution system, consists of strategically located National Consolidation centers augmented by regional warehousing locations that serve as a consolidation depot or a regional facility for daily deliveries of your contractors' or installers' needs. These locations house supplies, materials, fixtures, equipment, signage, and any other merchandise required for your job. This system allows RPM-Express to make point-to-point and multiple stop disbursements for the rapid deployment of new displays, fixtures, and departments. And it virtually eliminates the damage experienced by shipping LTL, while eliminating store storage of bulky equipment and displays – not to mention eliminating disruption created at the store site.

It is because of ingenious solutions such as this, that we can make this promise: “We guarantee a 100% on time, complete and damage-free delivery and installation. Then you receive just one invoice, from one company: RPM.”

RPM-EXPRESS

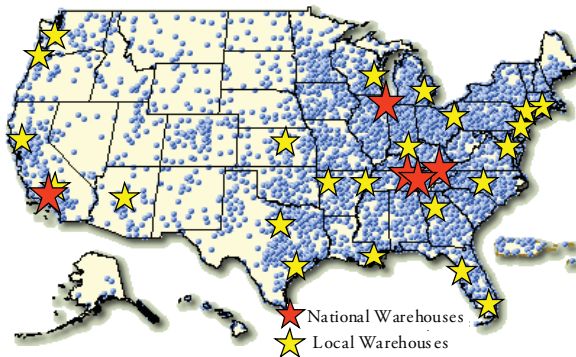

the key to unparalleled logistical support

RPM-Express is our logistical delivery system that makes point-to-point and multiple stop drops through strategically located distribution centers around the nation. These distribution centers stock fixtures, equipment, materials, signage, and all the merchandise necessary for any retail chain rollout or fulfillment program.

Look to RPM-Express for planning, transportation, consolidations, reverse consolidations, warehousing, inventory management, fulfillment, distribution services, and more. Why have your in-house people manage your logistics? Just tell us where it is, where it needs to go, when it needs to be there, and we'll do the rest. We accommodate virtually any operational requirement with:

- Full truckload setups and two-tier deliveries
- A nationwide network of strategically located distribution centers
- Inventory programs from pick-and-pack parts and pieces to reverse consolidation
- Inventory management services to complement in-house teams

5 National and 34 Local Warehouses

RPM-Express: “We move it to where it needs to be.”

RPM FIELD SERVICE AND RPM FASTTRAK the keys to in-store assembly, installation, and merchandising

To best serve your locations wherever they may be, we've created 82 RPM Field Service Operations offices – replete with local warehouses – across North America. RPM FSOs are supported by more than 600 RPM FastTrak teams. These teams handle tactical 'in-store' placement, assembly, merchandising, and installation of point-of-purchase displays, fixtures, and complete departments inside retail chain stores. RPM FastTrak people do whatever it takes to get the job done, sometimes even drive the trucks! They coordinate with the distribution centers and update the RPM online program management database so there is never any question about the status of your project. They can even upload digital images so you can view the progress on your computer.

Together, RPM FSOs and FastTrak teams assume the responsibility for everything from tracking component shipments to getting the installation up on time. The RPM team understands that customer satisfaction includes everybody from the Store Manager to the CEO. Because we manage risks for you, you won't spend hours searching for misdirected pieces of the installation puzzle, and you won't push back openings because local stores weren't in sync with corporate planners. FSOs also perform:

- Store openings, rollouts, and renovations
- Survey and CAD drafting for site evaluations
- Fully staged installations
- Merchandising and in-store demonstrations
- Certified client-specific pre-project training
- Store maintenance

Locations of RPM FSOs

RPM LOGISTICS AND PLANNING

- Point-to-Point: Dedicated loads – sequenced by onsite project manager needs
- “Store in a Box”: Drop trailers serve as a local work space / fixture storage, where space is at a premium – usually the remodeling of an existing store
- “Milk Run”: multiple stores/stops per load
- Inter-Modal: trains, ships, and trucks combined for the best cost international deliveries
- LTL: National distributions of small package services.
- Cross Docking: with inside deliveries by RPM FastTrak teams
- Rolling Warehouse: Bulk product distributed per store by RPM FastTrak teams

OCEAN FREIGHT SERVICES

RPM, our overseas agents, and RPM-Express and Consolidators – our affiliate licensed Ocean Transport Intermediary (OTI) – can together offer our valued customers a comprehensive ocean freight shipping service to meet import, export, and cross-trade movement requirements. We make sure that your cargo moves on a strict transit schedule that meets all of your supply chain management needs. Our carriers, certified members of C-TPAT (Customs-Trade Partnership Against Terrorism), ensure a secure and expeditious supply chain for our customers.

RPM has developed strong ocean transport relationships, allowing us to negotiate the best possible terms for each customer's cargo movements. Our goal is to provide the highest level of communication and coordination with our customers. We facilitate a full range of ocean freight services, including:

- Full Container Load (FCL) Contract Management & Less-Than Container Load (LCL) Consolidation Programs
- Fixed-day, Multiple Sailings
- Fast Transit Times
- Oversized Cargo Transportation
- Containerized Transportation
- Trailer Transportation
- Ocean-to-Air Service
- Breakbulk, Packing, and Crating Services

Solve your ocean freight problems today. RPM will be pleased to facilitate ocean freight forwarding services that best meet your specific ocean cargo freight shipping needs.
